ABOUT ME

Experienced QA Automation Engineer and Python Web Developer with a strong background in designing, developing, and maintaining automated test scripts and web applications. Proficient in Java, Python, and various testing frameworks, including Selenium WebDriver and Pytest. Skilled in building robust RESTful APIs using Django and FastAPI, managing databases with PostgreSQL, MySQL, MongoDB and SQLite, and implementing CI/CD pipelines with Docker, Jenkins and GitLab CI. Adept at collaborating in Agile Scrum environments, ensuring high-quality code through rigorous testing, and leveraging modern tools for monitoring and performance optimization. Proven track record of translating complex requirements into technical specifications and delivering scalable solutions. Seeking opportunities in European companies with relocation options.

EXPERTISE

QA Automation — Selenium WebDriver, TestNG, Pytest, REST Assured

Web Development — Django, FastAPI, DRF, PostgreSQL, MySQL, MongoDB, SQLite

Financial Analysis — Excel, Macros, Budget Planning, Data Analysis with Large Tables

WORK EXPERIENCE

2017 - Present

QA Automation engineer | Python Web Developer | Lightcode DEVs LLC, Bishkek, Kyrgyzstan

Responsibilities as a QA Automation Engineer:

Automated Testing Execution: Conducting comprehensive Front-end, Back-end, Functional, API, Smoke, Regression, and End-to-end testings to ensure the robustness and functionality of software products.

Programming Expertise: Applying strong knowledge of the JAVA programming language and Object-Oriented Programming (OOP) concepts to develop and maintain automation frameworks and scripts.

Utilization of Automation Tools: Employing framework build tools like Maven and automation tools like Selenium WebDriver with Java, TestNG, JUnit, Cucumber, and REST Assured for testing Client-Server and Web-based Applications.

BDD Implementation: Implementing Behavior Development (BDD) using the Cucumber feature, Scenarios, and Step Definitions, for writing test scripts, and test cases.

Responsibilities as a Python Web Developer:

Web Application Development: Leveraging Python frameworks such as Django, Django Rest Framework (DRF), and FastAPI for developing and maintaining OOP scalable and user-friendly web applications.

Technological Proficiency: Skillfully engaging with technologies like Grafana, Zookeeper, Kafka, ClickHouse, Elasticsearch, and Kibana to optimize application performance and facilitate efficient data analysis.

Overall responsibilities:

Database Management: Effectively managing PostgreSQL, MySQL, MongoDB, and SQLite databases to ensure seamless integration and data management within web applications.

Containerization with Docker: Utilizing Docker for containerization, simplifying application deployment and management procedures.

Continuous Integration and Version Control: Executing Continuous Integration using Jenkins, integrating Git/GitHub for efficient version control, and managing the base code.

Agile Scrum Involvement: Participating in Agile Scrum ceremonies such as Sprint Grooming, Sprint Planning, Sprint Retrospective, and Scrum meetings to ensure collaboration and efficiency within the development team.

2018 - 2020

Lead program analyst engineer | OJSC Electric Power Plants, Bishkek, Kyrgyzstan

Orchestrating Sprint Activities: Acted as a pivotal liaison between developers and finance professionals, ensuring seamless coordination and collaboration within sprint cycles.

Translating Finance Team Requirements: Transformed intricate finance team requirements into comprehensive technical specifications for the 1C software, facilitating a smooth alignment between technical functionalities and financial needs.

Overseeing Customization and Compliance: Led the oversight of customizing 1C software to meet specific finance team requisites, ensuring strict adherence to finance regulations and local legislation.

Developing User Manuals and Guidelines: Spearheaded the development and maintenance of user manuals and guidelines, enhancing user experience and operational efficiency within the finance domain.

2017 - 2018

QA engineer in test | IberKyrgyz Wealth Group Ltd., Bishkek, Kyrgyzstan

Software Testing and Reporting: Conduct comprehensive manual testing of software application to identify defects, document issues accurately, and report findings to the development team using established protocols and tools.

User Training and Software Presentation: Assist in presenting software functionalities to users, providing training and support as needed, ensuring a smooth user experience, and addressing queries or concerns.

2011 - 2016

Senior Financial analyst | OJSC Optima Bank, Bishkek, Kyrgyzstan

Financial Analysis: Conduct comprehensive financial analysis to assess the bank's performance, including analyzing financial statements, evaluating financial risks, and identifying opportunities for improvement.

Budgeting and Forecasting: Lead the budgeting process by developing financial forecasts, preparing annual budgets, and monitoring variances to ensure financial goals are met.

Strategic Planning: Contribute to the development of financial strategies aligned with the bank's objectives, providing insights and recommendations to support decision-making at the executive level.

Financial Reporting: Prepare and oversee the preparation of financial reports, presenting key financial information to management, stakeholders, and regulatory bodies accurately and in a timely manner.

Process Improvement: Identify opportunities for process optimization and efficiency enhancement within financial operations, leading initiatives to streamline processes and improve overall performance.

EDUCATION

2006 - 2011 — University degree | Kyrgyz-Russian Slavic University, Bishkek, Kyrgyzstan

Present — Middle Python Developer - Yandex practicum

2023 — Big Data Analytics - CDAC, Noida, INDIA

2020 — Java, SDET

2020 — Python Programming Language

2018 — ProgrammerAyimdar - Grant IT training (US embassy Democratic Commission)

SKILLS

Java | (OOP, ORM) | Python | HTML & CSS, TestNG, Selenium WebDriver/Grid, Selenide, JUnit, Cucumber, BDD, Rest Assured, JDBC, Django, DRF, FastAPI, MongoDB, Postgres, MySQL, SQLite, Docker, ETL, Elasticsearch, Redis, Kafka, RabbitMQ, ZooKeeper, CI/CD Jenkins, Windows, Linux Shell Scripting, Git, GitHub, GitLab, Jira

LANGUAGES

English (80%), Russian (100%), Kyrgyz (100%)
